Summary

Aspiring AI & Data Science Engineer passionate about building impactful digital products that combine artificial intelligence, modern web technologies, and user-centered design. Experienced in developing AI-powered applications, designing intuitive user experiences, and leading student communities through sports, entrepreneurship, and innovation-driven initiatives. Strong interest in product development, full-stack engineering, and scalable technology solutions.

Achievements

- Winner - Base44 Campus Hackathon.
- Participant - NASA Space Apps Challenge.
- Participant - Multiple National-Level Hackathons.
- Runner-Up - School Chess Championship.
- President - E-Sports Club, NIAT.
- Successfully hosted and managed multiple campus sports tournaments and competitive events.
- Built and shipped multiple AI-powered and full-stack applications.

Experience & Leadership

President - E-Sports Club, NIAT 2025 - Present

- Lead the planning and execution of competitive gaming and sports-related events.
- Organized and hosted multiple tournaments, increasing student participation and engagement.
- Coordinated teams, event logistics, sponsorship outreach, and promotional activities.
- Developed leadership, team management, and event-planning skills through large-scale campus events.

Member - Entrepreneurship Club, NIAT 2025 - Present

- Participate in startup-focused discussions, innovation challenges, and entrepreneurial initiatives.
- Collaborate with students on business ideas, product validation, and market research.
- Contribute to brainstorming sessions focused on solving real-world problems through technology.

Technical Skills

Languages	JavaScript, Python, HTML, CSS, SQL
Development	React, Firebase, REST APIs, Authentication Systems, Git, GitHub
AI & Data	Prompt Engineering, AI Integrations, LLM Workflows, AI Tools
Design	Figma, UI/UX Design, Product Thinking, Wireframing, Prototyping
Tools	VS Code, Xcode, Firebase Console, GitHub, Canva

Selected Projects

SRUVO - AI-Powered Pet Care Ecosystem

- Developed a comprehensive pet-care platform integrating AI assistance, veterinary support, booking systems, service management, and pet profiles.
- Designed and scaled features focused on accessibility, user engagement, and simplified pet ownership.
- Built with a product-first approach to provide a unified digital ecosystem for pet owners.

Virtual Gardener AI

- Built an intelligent gardening assistant capable of analyzing plant conditions and generating personalized care recommendations.

- Integrated weather APIs and location-based insights for watering schedules and seasonal guidance.
- Applied AI-driven recommendations to improve plant health and maintenance outcomes.

Habit Tracking Application (Streakly)

- Designed and developed a productivity-focused habit tracking platform centered around consistency and long-term behavior improvement.
- Implemented reminders, progress tracking, streak systems, and personalized user experiences.
- Focused on simplicity, usability, and engagement through thoughtful product design.

Education

Sanjay Ghodawat University, Kolhapur

2025 - Present

B.Tech - Artificial Intelligence & Data Science

Relevant Coursework: Object-Oriented Programming, Data Structures & Algorithms, Programming Fundamentals, Software Engineering, Database Management Systems, Web Development
